

October 3, 2025  
MANI, INC.

## Donation for the Renovation of the Tochigi Children's Science Museum Showcasing Medical Technology Through Interactive Exhibition

MANI, INC. (hereinafter referred to as "MANI") is proud to support the renovation and reopening of the Tochigi Children's Science Museum (Kojima Children's Science Park), which officially reopened on October 3, 2025. As part of our ongoing commitment to contributing to the local community, MANI has established a permanent product exhibition booth at the museum.

The permanent product exhibition features interactive content using touch panels, based on MANI's medical devices. This allows children to engage with the mechanisms behind medicine and technology, inspiring their future learning and dreams while having fun.

In line with MANI's corporate policy, "The Best Quality in the World, to the World," MANI will continue to support the growth of the local community and the children who will lead the next generation.

- Exhibition Period  
From October 3, 2025 (Friday) onward
- Exhibition Content  
The exhibition offers simulated, hands-on experiences with touch panels, featuring MANI products such as surgical needles, dental files, ophthalmic knives, and skin staplers.
