**Smaregi to Showcase at "RETAILTECH JAPAN 2026"**  
**— Moving Beyond "POS" to Advanced Payment Solutions and Integrated AI Analytics —**

Smaregi Inc. (Head Office: Chuo-ku, Osaka; Representative Director: Ryuhei Miyazaki; hereinafter “the Company”) is pleased to announce its participation in RETAILTECH JAPAN 2026, Japan’s largest specialized exhibition for retail information systems, held at Tokyo Big Sight starting March 3, 2026.

At this year’s exhibition, Smaregi will demonstrate its evolving ecosystem that extends far beyond traditional cloud-based POS functions. The showcase will feature:

- **The "Smaregi EC" series:** Integrated OMO (Online Merges with Offline) solutions from our subsidiary, Netshop Supporters Co., Ltd.
- **Next-Generation "PAYGATE" Terminals:** The world debut of new hardware designed to deepen our fintech vertical.
- **AI-Driven Business Intelligence (BI):** New data analytics tools designed to convert Big Data into actionable management insights.

**Key Exhibits: Strategic Product Roadmap**

The Company will unveil the following strategic products currently slated for release, highlighting our transition into a comprehensive retail-tech platform.

**1. New Payment Terminals: "PAYGATE P5" & "PAYGATE P5L."**

We are evolving payment from a "point-of-sale" transaction into a "comprehensive solution" integrated seamlessly with our POS software.

- **PAYGATE P5 (All-in-One Mobile):** A high-performance, octa-core terminal that handles the entire value chain—product registration, checkout, receipt printing, and cashless payments—in a single handheld device. Ideal for pop-up stores and tableside ordering.

- **PAYGATE P5L (Ultra-Slim Multi-System):** A specialized, printer-less terminal designed for hardware integration. It functions as a customer-facing display or an OES (Order Entry System) terminal, capable of high-speed passport scanning for automated tax-free sales processing—a critical feature for capturing Japan's growing inbound tourism demand.

## 2. "Smaregi BI" (AI-Powered Business Intelligence)

Building on our recently released "Automated Daily Report" features, Smaregi BI allows merchants to analyze massive datasets without specialized technical knowledge.

\*Image for illustrative purposes only

- **Actionable Insights:** By correlating data from Smaregi POS with our attendance management system, Smaregi TimeCard, the tool visualizes the relationship between sales and labor costs (L-ratio), empowering data-driven decision-making for store owners.

## **Exhibition Overview: RETAILTECH JAPAN 2026**

RETAILTECH JAPAN is the premier platform for IT vendors and startups to showcase solutions for Digital Transformation (DX) in the retail and food service sectors. The 2026 event focuses on addressing Japan's labor shortage through operational efficiency and AI-driven customer experiences.

- Date/Time: March 3 (Tue) – March 6 (Fri), 2026 | 10:00 – 17:00 (JST)
- Venue: Tokyo Big Sight (East Exhibition Halls)
- Smaregi Booth: K-6-4
- Organizer: Nikkei Inc.
- Expected Attendance: Approximately 80,000 visitors
