Notice Regarding the Development of the Contact Lens
Material Design System “SilicoSim”

Menicon Co., Ltd. (hereinafter, the “Company”) announces that the development platform for “SilicoSim,” a contact lens material design system based on multiscale modeling that integrates measurement technologies and computational science, has been developed through a collaborative research project with Tohoku University.

SilicoSim is a simulation system capable of accurately reproducing the nanoscale internal structures of contact lens materials and the functions derived from those structures. Going forward, the Company will utilize SilicoSim for the R&D of contact lens materials as well as for the performance evaluation of existing products. In addition, the Company will continue to promote research activities through industry-academia collaboration with Tohoku University with the aim of realizing the design of ideal contact lenses.
