**Notice Regarding the Successful Launch of
Synspective's 11th Small SAR Satellite in the StriX Series**

Synspective Inc. (the "Company") hereby announces that its 11th small SAR satellite has been successfully placed into orbit launched by an Electron rocket of Rocket Lab USA, Inc. (Headquarters: California, U.S.A.; CEO: Sir Peter Beck), and has successfully deployed its antenna.

The 11th satellite was launched into orbit by Rocket Lab's Electron rocket from Launch Complex 1 on New Zealand's Mahia Peninsula on September 2, 2026, 21:01 (Japan Standard Time). The antenna was successfully deployed, communications for testing functioned properly, and the satellite was confirmed to be controllable. Over the coming months, Synspective will conduct testing and commissioning to verify the satellite's observation capabilities before entering service.

This matter has been incorporated into the consolidated earnings forecast for the fiscal year ending December 2026, which was disclosed on February 13, 2026. The Company will promptly inform you of any matters requiring disclosure that may arise in the future.

END

(For reference) This document is being released following the dissemination of information on the Company's website on September 2 (Japan Standard Time).
