Daido Metal Co.,Ltd. Awarded Gold Medal Supplier Award by CSSC Group for Third Year Running Selected as a "Four-Star Gold Medal Supplier" for FY2025

Daido Metal Co., Ltd. was selected as a FY2025 "Four-Star Gold Medal Supplier" at the supplier meeting hosted by the CSSC Group (Note 1: China State Shipbuilding Corporation; headquarters: Shanghai, China) on October 30, 2026.
This marks the third consecutive year that Daido Metal has received a supplier award from the CSSC Group.

"FY2025 Four-Star Gold Medal Partner"
plaque presented by the CSSC Group

We see this third consecutive award as a testament to the continued recognition we have earned through our business partnership to date and the relationship of trust we have built with the CSSC Group. This award also demonstrates that, in our Marine and Energy business, which we have positioned as a growth area, we are steadily building an important customer base that will support future business expansion. Going forward, based on strong relationships of trust with our customers like this one, we will steadily capture business opportunities in the Marine and Energy field, including for bearings for large-scale ship engines, for which demand is expected to grow, and translate them into sustainable growth.
In addition, while responding to changes in the marine industry, including the need to accommodate engines for new ships using next-generation fuels, we will pursue further improvements in quality, technology, and service and strengthen our stable supply system to deliver value that meets customer expectations.

(Note 1) About CSSC Group

CSSC Group (China State Shipbuilding Corporation Limited) is a Chinese state-owned shipbuilding group with China's largest shipbuilding and ship repair bases that engages in a wide range of activities from the research and development of ships and related products to their construction and repair.

About Daido Metal:

Since our establishment in 1939 we have become a 'comprehensive plain bearing manufacturer' manufacturing and selling bearings for a wide variety of industries including automotive, marine, construction and general industry, and have established sales, production and R&D systems across the globe in the five regions of Japan, North America, Europe, Asia and China. We have a global share of 39.6% for bearings for automotive engine use and a 66.8% share of bearings for large-size marine engine use, giving us the top global share of the market. (Share based on 2025 figures/company estimate.)
